Summary

I am a skilled Web Developer with over 2 years of experience specializing in the MERN stack and Next.js. Skilled in building high-quality, scalable, and user-friendly web applications with a strong focus on clean, maintainable code and optimized performance.

Proficient in both front-end and back-end development, with hands-on expertise in React.js, Next.js, Node.js and AI integration Experienced in deploying applications on platforms such as AWS, Render, and Vercel.

Proven track record of delivering successful projects for multiple companies and clients, integrating innovative solutions, and ensuring top-tier quality at every stage.

Skills

- **Frontend Development:** React.js, Next.js, Svelte, scss,Tailwind CSS, Shadcn/UI, Redux, GSAP
- **Backend Development:** Node.js, Express.js, RESTful APIs, Prisma ORM, Knex.js , Inngest, SSE, Websockets
- **Programming Languages:** JavaScript (ES6+), TypeScript, C++, Solidity
- **Blockchain/Web3:** Ethereum, Web3.js, Ethers.js, Hardhat, Truffle, Ganache, Smart Contracts
- **Databases:** PostgreSQL, MongoDB, Firebase
- **Testing:** Mocha, Chai, Unit Testing, Integration Testing
- **Development Tools:** Git, GitHub, Docker, LaTeX, Postman
- **Deployement:** AWS EC2, AWS Lightsail, Vercel, Render, Linode
- **Operating Systems:** Linux

Experience

Red Star Technologies — MERN Stack Developer G13/4, Islamabad
Present

- Delivered high-quality, client-focused solutions across multiple projects as a MERN and Next.js developer.
- Successfully closed and retained multiple clients through consistent delivery of robust and scalable applications.
- Integrated AI-driven features into various client projects, enhancing functionality and user experience.
- Maintained a strong professional reputation through reliability, technical expertise, and commitment to excellence.

Code Crush — MERN Stack Developer Satellite Town, Rawalpindi
Present

- Designed and developed 4 full-stack web applications using the MERN stack
- Developed RESTful APIs with Express.js, serving data to React frontend
- Designed scalable backend with MVC, TypeScript, and ES modules

OIRRC — Junior web Developer JB Tower, Peshawar

- Developed scalable full-stack applications using **Next.js**, handling both client-side and server-side logic.
- Maintained relational databases using **PostgreSQL** for optimized data management.
- Integrated **Prisma ORM** for efficient database modeling, migrations, and queries.

Projects

I. Owner Global Live

- Developed the whole frontend following the best practices and maintained scaleability
- Implemented the SSE to show the progress of the async operations on the backend
- Implemented SSO on Laravel for the seamless login on all owners products
- **Technologies:** Next.js, Tailwind CSS, Node.js, TypeScript, Redux, AWS Services.

II. Owner Universe Super Admin Live

- Optimized backend code for seamless connectivity with remote instances and AWS RDS operations using an OOP-based architecture.
- Developed and integrated user impersonation functionality to enhance administrative capabilities.
- Applied industry best practices for code quality, version control, and streamlined deployment workflows.
- Resolved numerous frontend and backend bugs, improving system stability and user experience.
- **Technologies:** Next.js, Tailwind CSS, Node.js, TypeScript, Redux, AWS Services.

III. Klic (Streaming Web App) Live

- Refactored both backend and frontend codebases to significantly improve performance, scalability, and maintainability.
- Resolved numerous critical bugs, enhancing application stability and ensuring high client satisfaction.
- Implemented best practices for code quality, version control, and deployment workflows.
- **Technologies:** Next.js, GraphQL, SCSS, Node.js, TypeScript, Redux, AWS services.

IV. Leyloon Live

- Developed a premium online jewelry platform enabling users to browse and customize bespoke moissanite and lab-grown diamond jewelry.
- Implemented a custom jewelry design engine for selecting stone type, shape, size, and metal for a personalized customer experience.
- Integrated an **AI jeweler** to guide users through their dream piece design process.
- **Technologies:** Next.js, Next.js API Routes, TanStack Query, Radix UI, NodeMailer, Anime.js, Context API, VDB API.

V. On Point Live

- Built a full-stack web app acting as a wrapper for IRISCRM, handling complex business logic and CRM integration.
- Implemented cron jobs using **Inngest** for automated monthly deal imports and calculated rep goals based on PTO and performance.
- Developed a companion mobile app using **React Native** and **Nativewind**, integrating APIs from the Next.js backend for a unified experience.
- **Technologies:** Next.js, React Native, Nativewind, Inngest, Tailwind CSS, IRIS APIs.

VI. Blockchain Criminal Records System GitHub

- Led development of blockchain-powered platform for secure criminal record management using CNIC and facial recognition
- Implemented smart contracts for immutable record storage with role-based access control
- **Technologies:** Next.js, Tailwind CSS, MongoDB, Ganache, Truffle, Solidity

VII. Decentralized Chatting App GitHub

- Built a secure, blockchain-based messaging platform ensuring decentralized communication.
- Implemented smart contract logic for real-time message validation and storage.
- **Technologies:** Next.js, Hardhat, CSS.

VIII. Desktop Application GitHub

- Built a cross-platform desktop application integrating Electron.js and React.js.
- Used SQLite as a serverless database with Knex.js for optimized queries.
- **Technologies:** React.js, Electron.js, Knex.js, SQLite, Node.js.

Education

Bachelor of Computer Science 2020 – 2024
University of Peshawar
Relevant Coursework: Data Structures, Algorithms, Database Systems, Web Development, Blockchain Fundamentals
