Summary

Full-stack AI engineer with **3 years** of experience building scalable web, mobile, and AI applications. Skilled across modern technologies including **Next.js, React.js, React Native, Svelte, Vue.js, Node.js, FastAPI, PERN and MERN Stack**. Delivered **15+ projects**, including **5+** end-to-end full-stack products from architecture and development to CI/CD pipeline setup, deployment, and production maintenance. Focused on building scalable systems while following industry-standard engineering practices and clean architecture principles.

Experienced in client communication, requirement gathering, and translating business pain points into practical technical solutions. Worked directly with multiple clients to successfully deliver products aligned with their goals and expectations.

[Portfolio](#) reflects the range and quality of projects delivered across different domains and technologies.

Skills

- **Programming Languages:** TypeScript, JavaScript (ES6+), Solidity, Python
- **Frontend Development:** React.js, Next.js, Svelte, React Native, Expo, Tailwind CSS, NativeWind, SCSS, Redux, Shadcn/UI, GSAP
- **Backend Development:** Node.js, FastAPI, Express.js, REST APIs, Prisma ORM, Knex.js, Redis, WebSockets, Server-Sent Events (SSE), Stripe, Inngest
- **AI & GenAI:** OpenAI API, Retrieval-Augmented Generation (RAG), Vector Embeddings, pgvector, Automation pipelines
- **Blockchain/Web3:** Ethereum, Ethers.js, Web3.js, Hardhat, Truffle, Ganache, Smart Contract Development
- **Databases:** PostgreSQL, MongoDB, Firebase, Supabase
- **Testing:** Mocha, Chai, Unit Testing, Integration Testing
- **Cloud & Deployment:** AWS EC2, AWS Lightsail, Docker, Vercel, Render, Linode, CI CD pipelines, PM2, Clustering
- **Tools:** Git, GitHub, Postman, Linux

Experience

Red Star Technologies — Full Stack Developer

G13/4, Islamabad
May 2025 - Present

- Delivered scalable client-focused applications as a MERN and Next.js developer, integrated AI-driven features, and maintained strong client retention through reliable high-quality delivery.

Code Crush — MERN Stack Developer

Satellite Town, Rawalpindi
Nov 2024 - May 2025

- Designed and developed 4 full-stack MERN applications, built RESTful APIs with Express.js for React frontends, and implemented scalable backend architectures using MVC, TypeScript, and ES modules.

OIRRC — Junior web Developer

JB Tower, Peshawar
Jan 2024 - Nov 2024

- Developed scalable full-stack applications using **Next.js**, managed relational databases with **PostgreSQL**, and integrated **Prisma ORM** for efficient modeling, migrations, and querying.

Projects

FULL STACK

I. Owner Inventory

[Live](#)

- Architected a multi-tenant SaaS inventory ecosystem connecting **Owners Global** with the **Owners Inventory** client app, supporting secure tenant provisioning and cross-platform organization data synchronization.
- Built custom SSO, JWT-secured invitations, automated email dispatch, SSE progress updates for long-running operations, and Stripe subscription billing with webhook handling.
- **Technologies:** Next.js, TypeScript, Node.js, Express.js, SES, PHP, Laravel, Blade, MySQL, Stripe, AWS, Redis.

II. Klic (Streaming Web App)

[Live](#)

- Worked on a full-stack game streaming app with a **Next.js** frontend and **Node.js**/AWS Lambda backend, improving performance, scalability, and stability.

- Integrated Amazon IVS for low-latency game streaming and interactive chat.
- **Technologies:** Next.js, Node.js, AWS Lambda, GraphQL, SCSS, TypeScript, Redux, AWS IVS.

III. Owner Super Admin

[Live](#)

- Built admin tooling for remote instance connectivity, AWS RDS operations, user impersonation, deployment workflows, and production bug fixes.
- **Technologies:** Next.js, Tailwind CSS, Node.js, TypeScript, Redux, AWS.

IV. KolabMe (A health care platform)

[Live](#)

- Developed a health care platform for appointments, telemedicine access, records, real-time doctor-patient chat, and admin controls.
- **Technologies:** React.js, Node.js, Express.js, Websockets, AWS, Redux.

V. On Point

[Live](#)

- Built a full-stack CRM wrapper for IRISCRM with automated monthly deal imports, rep goal calculations, and a React Native companion mobile app.
- **Technologies:** Next.js, React Native, Nativewind, Inngest, Tailwind CSS, IRIS APIs.

VI. Decentralized Chatting App

[GitHub](#)

- Built a blockchain-based messaging platform with smart contract-backed message validation and decentralized communication.
- **Technologies:** Next.js, Hardhat, CSS, Solidity,

Assistant

GENAI & AI AUTOMATIONS

VII. Leyloon

[Live](#)

- Developed a premium jewelry customization platform with stone, shape, size, and metal selection plus an AI jeweler assistant for guided product discovery.
- **Technologies:** Next.js, Next.js API Routes, TanStack Query, Radix UI, NodeMailer, Anime.js, Context API, VDB API.

VIII. AI-Powered Proposal Generator

- Architected a RAG-enhanced proposal system with OpenAI ingestion, pgvector search, semantic portfolio Q&A, and anti-hallucination constraints.
- **Technologies:** Next.js, React 19, Supabase, PostgreSQL, pgvector, OpenAI API, Inngest, Tailwind CSS, shadcn/ui.

IX. Web-Based Linux Inspired OS

[Live](#)

- Created an interactive portfolio OS with window management, Xterm.js terminal integration, and a Gemini-powered expertise chatbot.
- **Technologies:** Xterm.js, Svelte, SCSS, Gemini API.

FRONTEND

X. Nomacal

- Built a responsive production interface for [Nomacal](#).

XI. CremeXchange

- Built responsive frontend screens for [CremeXchange](#).

XII. Govio

- Delivered production-ready frontend UI for [Govio](#).

XIII. Aram Tours

- Built responsive travel website UI for [Aram Tours](#).

XIV. E-Help

- Built a responsive frontend interface for [E-Help](#).

Education

Bachelor of Computer Science
University of Peshawar

Relevant Coursework: Data Structures, Algorithms, Database Systems, Web Development, Blockchain Fundamentals

2020 – 2024
