Summary

I'm a Full-Stack Engineer specializing in Next.js and the MERN stack, focused on building scalable, high-performance applications with clean architecture and great user experience. I also work with AI integrations, including RAG pipelines, vector databases, and secure backend systems that solve real business problems.

Skills

- **Programming Languages:** TypeScript, JavaScript (ES6+), Solidity, C++
- **Frontend Development:** React.js, Next.js, Svelte, React Native, Expo, Tailwind CSS, NativeWind, SCSS, Redux, Shadcn/UI, GSAP
- **Backend Development:** Node.js, Express.js, REST APIs, Prisma ORM, Knex.js, Redis, WebSockets, Server-Sent Events (SSE), Stripe, Inngest
- **AI & GenAI:** OpenAI API, Retrieval-Augmented Generation (RAG), Vector Embeddings, pgvector
- **Blockchain/Web3:** Ethereum, Ethers.js, Web3.js, Hardhat, Truffle, Ganache, Smart Contract Development
- **Databases:** PostgreSQL, MongoDB, Firebase, Supabase
- **Testing:** Mocha, Chai, Unit Testing, Integration Testing
- **Cloud & Deployment:** AWS EC2, AWS Lightsail, Docker, Vercel, Render, Linode
- **Tools:** Git, GitHub, Postman, Linux

Experience

Red Star Technologies — Full Stack Developer	G13/4, Islamabad May 2025 - Present
• Delivered high-quality, client-focused solutions across multiple projects as a MERN and Next.js developer. • Successfully closed and retained multiple clients through consistent delivery of robust and scalable applications. • Integrated AI-driven features into various client projects, enhancing functionality and user experience.	
Code Crush — MERN Stack Developer	Satellite Town, Rawalpindi Nov 2024 - May 2025
• Designed and developed 4 full-stack web applications using the MERN stack • Developed RESTful APIs with Express.js, serving data to React frontend • Designed scalable backend with MVC, TypeScript, and ES modules	
OIRRC — Junior web Developer	JB Tower, Peshawar Jan 2024 - Nov 2024
• Developed scalable full-stack applications using Next.js, handling both client-side and server-side logic. • Maintained relational databases using PostgreSQL for optimized data management. • Integrated Prisma ORM for efficient database modeling, migrations, and queries.	

Projects

I. Owner Inventory	Live
• Architected a multi-app ecosystem, enabling secure provisioning and seamless cross-platform synchronization of organizational data between Owners Global and the Owners Inventory client application. • Integrated Server-Sent Events (SSE) to broadcast robust, real-time progress indicators for long-running, asynchronous server operations, significantly enhancing user feedback. • Engineered a custom Single Sign-On (SSO) solution to facilitate seamless cross-domain authentication, centralizing the core authorization logic in Node.js while securely managing redirection paths via PHP. • Developed a comprehensive, multi-platform user invitation module, featuring JWT-secured tokens, automated email dispatch via BullMQ, and cross-service webhook synchronization for	

streamlined organization onboarding and role-based access control.

- Integrated end-to-end payment processing via Stripe, successfully configuring the billing flow across the frontend and backend, handling complex Stripe webhooks, and managing subscription add-ons.
- **Technologies:** Next.js, TypeScript, Node.js, Express.js, SES, PHP, Laravel, Blade, MySQL, Stripe, AWS (Lightsail, S3), Redis .

II. Klic (Streaming Web App)

[Live](#)

- Refactored both backend and frontend codebases to significantly improve performance, scalability, and maintainability.
- Resolved numerous critical bugs, enhancing application stability and ensuring high client satisfaction.
- Implemented best practices for code quality, version control, and deployment workflows.
- For low latency video streaming and interactive chatting amazon IVS (Interactive video service) is used
- **Technologies:** Next.js, GraphQL, SCSS, Node.js, TypeScript, Redux, AWS services.

III. KolabMe (A health care platform)

[Live](#)

- Developed a comprehensive health care platform enabling users to book appointments with doctors, manage their health records, and access telemedicine services.
- Chat feature with real-time messaging between doctors and patients.
- Admin dashboard for managing doctors, patients, appointments, and chat.
- **Technologies:** React.js, Node.js, Express.js, Websockets, AWS, Redux.

IV. Leyloon

[Live](#)

- Developed a premium online jewelry platform enabling users to browse and customize bespoke moissanite and lab-grown diamond jewelry.
- Implemented a custom jewelry design engine for selecting stone type, shape, size, and metal for a personalized customer experience.
- Integrated an **AI jeweler** to guide users through their dream piece design process.
- **Technologies:** Next.js, Next.js API Routes, TanStack Query, Radix UI, NodeMailer, Anime.js, Context API, VDB API.

V. On Point

[Live](#)

- Built a full-stack web app acting as a wrapper for IRISCRM, handling complex business logic and CRM integration.
- Implemented cron jobs using **Inngest** for automated monthly deal imports and calculated rep goals based on PTO and performance.
- Developed a companion mobile app using **React Native** and **Nativewind**, integrating APIs from the Next.js backend for a unified experience.
- **Technologies:** Next.js, React Native, Nativewind, Inngest, Tailwind CSS, IRIS APIs.

VI. AI-Powered Proposal Generator & Portfolio Assistant

- Architected a RAG-enhanced autonomous system with multiple pipelines to generate highly personalized and high-converting client proposals.
- Developed an asynchronous background ingestion pipeline using Inngest and OpenAI to distill and vectorize project data into a Supabase pgvector database.
- Engineered an autonomous Q&A interface for semantic portfolio queries, integrated with strict anti-hallucination constraints and zero-jargon safeguards.
- **Technologies:** Next.js, React 19, Supabase, PostgreSQL, pgvector, OpenAI API, Inngest, Tailwind CSS, shadcn/ui.

VII. Other Notable Projects

- [Nomacal](#) | [CremeXchange](#) | [Govio](#) | [Aram Tours](#) | [E-Help](#)

Education

Bachelor of Computer Science
University of Peshawar

2020 – 2024

Relevant Coursework: Data Structures, Algorithms, Database Systems, Web Development,
Blockchain Fundamentals
